

The screenshot displays a web browser window with the URL `localhost:5173/booking`. The page is titled "StaySense AI" and features a navigation bar with links: Home, About, Dashboard, Book Now, Login, and a Light/Dark theme toggle. The main content area includes a "Search & Filter" section with input fields for location (Mussoorie), budget (Under ₹2000), and rating (4.5+). Below this, a "Forest View Stay" listing is shown for Mussoorie with a 4.7 rating and a price of ₹1799/night, accompanied by a "Book Now" button.

The right side of the image shows the browser's developer tools, specifically the Network tab. It displays a list of 39 requests, including various JavaScript files and a pending WebSocket connection. The table below summarizes the visible requests:

Screenshot 1: Homestay Explorer Page

Booking page displaying homestay listings retrieved from the backend API. Users can search and filter homestays by location, budget, and ratings, demonstrating successful frontend-backend integration.

The screenshot displays a web browser window with the URL `localhost:5173/booking`. The page features a dark theme and a navigation bar with links: Home, About, Dashboard, Book Now, and Login. A 'Light' theme toggle is also present. Below the navigation bar, a search and filter section allows users to input a location (Rishikesh), select a budget, and choose a rating. Two featured homestay listings are shown: 'Mountain Retreat' in Rishikesh with a 4.9 rating and price of ₹2499/night, and 'Riverside Cottage' in Rishikesh with a 4.8 rating and price of ₹1999/night. Both listings have a 'Book Now' button.

The browser's developer tools are open to the Network tab, showing a list of requests. The first request, `homestays`, is highlighted with a blue box. A callout box provides details about this request:

- API Request**
- GET /api/homestays**
- Status: 200 OK**
- This request fetches homestay listings from the backend API.

Screenshot 2: Backend Data Display on Booking Page

Booking page displaying homestay listings retrieved from the backend REST API. Users can search and filter homestays by location, budget, and ratings, demonstrating successful frontend-backend integration.

The screenshot shows a web browser at `localhost:5173/booking` with a 'StaySense AI' interface. A 'Booking Confirmed' popup is displayed in the center, stating 'Thank you Om Sai Patra. Your booking has been confirmed successfully.' with a 'Close' button. The background shows a search filter for 'Rishikesh' and two hotel listings: 'Mountain Retreat' (₹2499/night) and another hotel (₹1999/night). The browser's Network tab is open on the right, showing a list of API requests.
